DRAFT AND STRUCTURE

Analyze the integration of knowledge and ideas within and across texts, including the integration of visual elements such as maps and charts, to enhance comprehension and make thinking visible. (Grade 9-10)

Analyze how and why individuals, events, and ideas are represented and compared within a text (e.g., by the creation of visualizations); how comparisons and relationships are developed and refined; and how authors manage information in a text, including how authors’ choices and the title or subtitle of the text contribute to the organization, development, and overall meaning of a text. (Grade 9-10)

Analyze the advancement of knowledge and ideas within and across texts, including the integration of visual elements such as maps and charts, to enhance comprehension and make thinking visible. (Grade 11-12)

Analyze how and why individuals, events, and ideas are represented and compared within a text (e.g., by the creation of visualizations); how comparisons and relationships are developed and refined; and how authors manage information in a text, including how authors’ choices and the title or subtitle of the text contribute to the organization, development, and overall meaning of a text. (Grade 11-12)

ADAPTATION OF KNOWLEDGE AND IDEAS

Analyze how and why individuals, events, and ideas are represented and compared within a text (e.g., by the creation of visualizations); how comparisons and relationships are developed and refined; and how authors manage information in a text, including how authors’ choices and the title or subtitle of the text contribute to the organization, development, and overall meaning of a text. (Grade 11-12)

Analyze the advancement of knowledge and ideas within and across texts, including the integration of visual elements such as maps and charts, to enhance comprehension and make thinking visible. (Grade 11-12)

Analyze how and why individuals, events, and ideas are represented and compared within a text (e.g., by the creation of visualizations); how comparisons and relationships are developed and refined; and how authors manage information in a text, including how authors’ choices and the title or subtitle of the text contribute to the organization, development, and overall meaning of a text. (Grade 11-12)

DEGRADED WEALTH

1. Read closely to determine the main idea of a multiliteracy text, including visually complex materials, as well as to locate and analyze a variety of technical, scientific, or historical information in a given context. (Grade 11-12)

2. Determine the central purpose of a text, including visually complex materials, as well as to locate and analyze a variety of technical, scientific, or historical information in a given context. (Grade 11-12)

3. Read closely to determine the main idea of a multiliteracy text, including visually complex materials, as well as to locate and analyze a variety of technical, scientific, or historical information in a given context. (Grade 11-12)

4. Determine the central purpose of a text, including visually complex materials, as well as to locate and analyze a variety of technical, scientific, or historical information in a given context. (Grade 11-12)

5. Read closely to determine the main idea of a multiliteracy text, including visually complex materials, as well as to locate and analyze a variety of technical, scientific, or historical information in a given context. (Grade 11-12)

6. Determine the central purpose of a text, including visually complex materials, as well as to locate and analyze a variety of technical, scientific, or historical information in a given context. (Grade 11-12)
