

HOW TO SETUP PRINTER USING IP ADDRESS

Step 1:

1. Select "Launch Pad" from the Dock 
2. Select "Self Service" 
3. Then, click "Install" option for Kyocera Drivers. 
4. Close "Self Service".

Step 2:

1. Find IP Address located on front of printer. 
2. Open "System Settings" from the Dock. (Was called System Preferences)
3. Select, Printers & Scanners (Bottom of the list).
4. Click "Add Printer, Scanner, or Fax..."
5. Select the "Globe/IP" icon. 
6. Type your IP address from printer. Ex. 10.xx.xx.x
7. For Protocol, select "Line Printer Daemon - LPD"
8. In the "Name" text box, type the desired, ex. James Office.
9. In the "Use" text box, it will select the driver for the printer you are installing.

10. Click "Add".
11. Select Duplex Printer if the option exists.
12. Click "OK"
13. Setup is complete.
14. Restart System Settings.
15. Choose Select PDL from the bottom of the menu on the left.
16. Choose you printer you just installed and click the KPDL drop down menu.
17. Select PCL and Apply.
